Making an Important Difference – Air Duct Aseptics

Smells in buildings (and homes) can be pervasive, unpleasant, unhealthy, and sometimes difficult to eliminate. The culprit can be dirty ducts, leaky ducts, or both! In any case, the link between poor ventilation and poor indoor air quality has been well established.

Almost all ductwork leaks, and depending on the leakage locations, this leakage is one of the major causes of dirty ductwork, condensation and subsequent mold growth. Additionally these leaks draw in dirty attic, basement and non-filtered wall cavity air into our breathing zone every time our HVAC unit operates. These same leaks are costing thousands of dollars of waited electricity, causing comfort problems, and reducing the AC equipment capacity and performance.

Indoor Air Quality is a growing concern in every medical facility and home today. Exposure to mold may result in cold like symptoms, nasal and sinus congestion, respiratory problems, coughing, sore throat, watery eyes, skin irritations, and is a major trigger of asthma attacks. If high mold levels are present in a building, it is considered hazardous. The Environmental Protection Agency (EPA) states if levels of hazardous pollutants indoor has been found to be up to 70 times more hazardous than outdoor air and if mold is found in a conditioning system the unit should be tuned off.

An ounce of prevention is worth a pound of cure. When you need a professional to solve your indoor air quality needs, ADA is the company to call. Since 1990 ADA Aseptics has performed more than 45,000 commercial and residential projects throughout Florida. And ass certified members of the National Air Duct Cleaners Association and a Class A State licensed AC contractor, ADA has the experience and knowledge needed to improve your facility's indoor air quality. Contact ADA today for your complimentary facility HVAC duct inspection and to speak with one of our licensed mold assessors or certified indoor environmentalists.

South Florida Hospital News and Healthcare Report's number one goal is top quality healthcare journalism written and edited for the region's most successful, powerful healthcare business executives and professionals.
